- PowerBi
- SnowflakeSQL
- Python
- C#
- Javascript
- Algorithms

SOFT SKILLS

- Stress proof
- Communicative
- Problem solving
- Critical thinking
- Proactive

LANGUAGES

- English
- Bulgarian
- Russian

PROFILE

I'm a data analyst with experience in PowerBi and Snowflake. I proactively monitor data quality through wide range of validation tools that I have built for my team.

I'm used to solving problems with limited information and enjoy working with diverse teams to gather insights and deliver tailored solutions pinpointing bottlenecks and opportunities. I'm passionate about solving business issues by highlighting pain areas from different places, viewpoints and data sources .

As part of my university's computer science team, I helped win a national silver medal and ended a 20-year dry spell for my alma mater. I also mentor children in Bulgaria through non-profits, helping them prepare for and succeed in tech competitions.

WORK EXPERIENCE

Ulpia Tech
2023 - PRESENT
